

# Welcome to Year 7 Geography

This year is all about setting the scene of a subject many of you won't have realised that you have already started to study at primary school. We aim to start teaching you the skills that you need to become a great geographer and an amazing learner.

Geography is the study of the world in which you live- it includes aspects of every subject that you cover in school- but puts it into a real world context.

We start off the year helping you to find your bearings- allowing you to answer the question you all know that someone will ask after you tell them you have just had a geography lesson- 'what is the capital of X?!'

We then move on to Map skills; Weather and Climate and Settlement.

This will set you up for Year 8 and the opportunity to develop the skills you will need as a Geographer.
