

Welcome to Year 8 Geography

Year 8 is a year of consolidating and broadening your understanding of the world in which you live. We aim to make you aware of your involvement in the systems which make the world go round.

Coasts/Rivers/Glaciation

The world is shaped by many processes and we will look at how and why this happens.

Fashion

You all do it, you wear and buy clothes and in fact you are probably wearing the most exclusive item of clothing you will ever wear as you read this! How does it link to geography? You will find out.

Volcanoes

The most exciting and visually dramatic bit of geography! Who can't be enthralled by the spectacular eruptions- but why do they happen and how can they change your life?

USA

A major superpower- possibly the last of the old guard? What influence over the world does this incredibly diverse country have? What makes it distinct and why do people clamour to get there?
