

Enrichment Resources for Prospective Applicants

Strong applicants to Cambridge and other competitive universities have often explored their chosen subject through wider reading and enrichment work outside of their A Level (or equivalent) studies. This is called 'supra-curricular' activity, rather than 'extra-curricular', as it is primarily academic exploration, building on and going beyond what you are studying in school or college. A couple of hours each week spent on this material can really help you to explore your subject in new ways and to develop your knowledge and understanding of your field. The great thing is that there is no set formula or 'required reading': you choose the topics you will explore based entirely on your own interests. It's also a good way to scout out subjects you might want to study at university. After all, this sort of exploration should be enjoyable, so if you're not enjoying reading about it, you probably wouldn't enjoy studying it at university.

Disclaimer: the selection of reading lists and resources below have been gathered from Cambridge departmental and college websites, as well as the websites of other universities and online resources. They are not required reading lists for applicants to Cambridge and you are not expected to have read any of the below before applying to the university. They simply provide suggestions for ways to begin your own exploration of your subject if you are struggling to find resources. Unless otherwise stated, the resources are not endorsed by the University of Cambridge or Christ's College, which have no formal connection with them.

General Guidance

Perhaps the best single thing you can do to help you prepare in Year 12 to apply to competitive universities is to keep up to date with events and current affairs *as they pertain to your subject*. The simplest way to do this is to ensure that you regularly read quality journalism and search within this for articles related to your academic interests. Some suggestions include:

- Broadsheet newspapers: The Guardian, The Times, The Daily Telegraph
- BBC News online: www.bbc.co.uk/
- The Economist: www.economist.com/
- Reuters: <https://uk.reuters.com/> (change edition for international news)
- The New Statesman magazine: www.newstatesman.com/
- New Scientist magazine, news section: <https://www.newscientist.com/section/news/>
- Al Jazeera English: www.aljazeera.com/

Most strong applicants to Cambridge display the ability to think critically when presented with new information and to assess it in the light of their existing knowledge, making connections between the familiar and the unfamiliar and using their existing knowledge to assess the validity of what they have been shown. Use these different sources of news to develop your ability to do this. Assess their arguments and weigh their evidence. Consider why one source, e.g. Al Jazeera or Fox News, might present something differently to another and engage critically with the media you encounter.

Another excellent way to stay up to date with recent developments in your field of interest is podcasts. There is a wealth of academic podcasts available online, covering virtually every subject or topic you can think of. The beauty of these is that they are usually free to download and are completely low-hassle for you. Listen to them at your convenience: on the bus, in the gym, or whenever and wherever you please. See the individual subject listings for subject-specific podcasts, but for general resource banks see:

- Cambridge YouTube: <https://www.youtube.com/cambridgeuniversity>
- Cambridge online lectures at the University Streaming Media Service: <https://www.sms.cam.ac.uk/>
- Cambridge resources at TES: <https://www.tes.com/member/UniversityOfCambridge>
- Oxford University podcasts: <https://podcasts.ox.ac.uk/>
- UniTalks podcasts: <https://iai.tv/education/podcast>

Christ's College, Cambridge, CB2 3BU | Tel: +44 (0)1223 334900 | Fax: +44 (0)1223 334973 |

Email: access@christs.cam.ac.uk

www.christs.cam.ac.uk

Registered Charity Number: 1137540

- Times Higher Education podcasts: <https://www.timeshighereducation.com/academic/opinion/podcasts>
- BBC Radio 4 podcasts: <https://www.bbc.co.uk/podcasts/radio4>
- Educational podcast lists: <https://www.opencolleges.edu.au/informed/features/50-educational-podcasts-you-should-check-out/> and <https://networks.h-net.org/node/84048/pages/111820/academic-podcast-roundup>

Another option is to explore free online courses and university-level teaching material, much of which is published online. This can include entire undergraduate courses available for free with online lectures, downloadable course notes and academic discussion groups. Sites providing this material include:

- Cambridge's own HE+ website: <http://www.myheplus.com/>
- The websites of several American universities - see: <https://see.stanford.edu/>; <https://ocw.mit.edu/index.htm>; <http://online-learning.harvard.edu/>; <http://oyc.yale.edu/>
- The Open University's free courses: <http://www.open.edu/openlearn/about-openlearn/try>
- Other free online courses: <https://www.futurelearn.com/>; <https://www.khanacademy.org/>

There is also a wealth of other non-subject-specific material available online. Examples include:

- Hay Levels: <https://www.youtube.com/user/HayLevels/featured>
- Villier's Park Extension Activities: <https://www.villierspark.org.uk/online-activities/>

If you are looking for suggested reading which is specific to Cambridge, it is worth checking College websites for their reading lists for offer holders, as well as looking at the relevant faculty pages. For example, King's College has particularly useful lists arranged by subject:

www.kings.cam.ac.uk/study/undergraduate/offerholders/reading-lists/index.html

Similarly, Downing College has compiled a large range of resources and advice on their excellent website: <http://www.discoverdowning.com/resources/>

It is important to stress that you do not need to buy books or pay for any online resources. Everything that we link to here can be obtained freely, if occasionally on a limited access basis. In order to get access to certain books, or material that is behind a paywall (e.g. journals), try your school library and your local library and ask them what they subscribe to and what they can acquire through library loans. If you have a university near your home, you might be able to gain access to their library collections as well, which will include more specialist academic books and journals. Whatever you visit, speak to the staff and ask how they can help you.

Similarly, we would strongly discourage you from paying for online material and application support courses. In our experience, these are often poor value for money and we have equivalent support material available online for free. If you cannot find something, contact us and let us guide and direct you.

Finally, reading is a great way to explore subjects which you find interesting – but there are other ways to deepen your understanding: visit your local museums, monuments, galleries and natural features, and think analytically about nature, machinery or the built environment. Keep an eye out for seminars, taster days or other outreach activities run by any local universities which you could attend, or you might like to join a regional or national club or society related to your academic interests, and enter competitions such as essay prizes or maths Olympiads. The best thing about super-curricular activities is that there are no exams or deadlines to worry about – you are free to follow your own lines of enquiry into the areas that interest you the most! Rather than seeing this as an exercise purely to give you something to write about in your personal statement, you should take time to explore things that you genuinely find interesting. Most importantly, you should enjoy your wider reading: don't feel pressured to read something just because it might look 'impressive' – use it as an opportunity to develop your own academic interests.

Subject-Specific Resources

The following resources are grouped by Cambridge subject. As is the nature of our courses, every academic interest is covered, but they might not always be under the heading you would expect. For guidance about our courses and the subjects they cover, see the individual course pages on our website:

<https://www.undergraduate.study.cam.ac.uk/courses>

Anglo-Saxon, Norse and Celtic:

Music:

Cambridge's music course is really broad, with papers such as Early Music, Miles Davis, Music and Science and Music and Globalization (amongst all the traditional stuff you might expect!). Performance is a relatively small element of the first year course and a lot of time is spent in the library or at a piano composing. Familiarising yourself with score reading is important - [IMSLP](#) has all of the scores out of publication for free.
